PROFESSIONAL SUMMARY

DevSecOps & MLOps Engineer with 5+ years of enterprise experience architecting secure, scalable cloud infrastructure across telecom, fintech and AI platforms. Currently owning end-to-end DevSecOps and MLOps delivery for MTN Ghana and enterprise clients managing 150+ CI/CD pipelines, 10 Kubernetes clusters and GPU-enabled AI infrastructure on Azure. Specializes in platform engineering, cloud security and MLOps pipeline automation. Open to remote and international opportunities.

KEY ACHIEVEMENTS

- Architected and owns 150+ CI/CD pipelines with integrated Trivy, SonarQube and Azure Key Vault security gates securing 30+ MTN Ghana applications serving millions of Ghanaian users.
- Built and manages GPU-enabled MLOps infrastructure on AKS using Ollama, Kubeflow and MLflow enabling 3 AI engineers to deploy, version and serve LLM and ML models with zero manual environment provisioning.
- Manages 10 Kubernetes clusters across 5 environments (Dev, UAT, Production for MTN + internal UAT and Production) enforcing RBAC, network policies and zero-trust least-privilege access across all workloads.
- Led architecture design presentations to MTN Ghana stakeholders, driving approval and implementation of cloud infrastructure solutions at national telecom scale.

TECHNICAL SKILLS

Cloud Platforms	Azure (AZ-104), AWS, Oracle Cloud (OCI), DigitalOcean
Containers & Orchestration	Kubernetes (KCNA), Docker, Helm, AKS, RBAC, Network Policies
IaC & Automation	Terraform, Ansible, Bash, Python
CI/CD & MLOps	Jenkins, GitHub Actions, GitLab CI, Kubeflow, MLflow, Ollama
Security	Trivy, SonarQube, Azure Key Vault, Zero-Trust, Least-Privilege, DevSecOps
Observability	Kibana, OpenTelemetry, SigNoz, Grafana, ELK Stack
AI/ML Stack	HuggingFace, TensorFlow, Kafka, GPU Node Management (Azure)
Databases	Oracle DB (Enterprise), PostgreSQL, MySQL hardening, encryption, backup
OS & Networking	Linux (RHEL/Ubuntu), TCP/IP, DNS, Storage (OceanStor), HSM (Utimaco)

WORK EXPERIENCE

DevSecOps & MLOps Engineer

Adaptive Computer Solutions, Accra — Jan 2025 – Present

- Architect and own 150+ CI/CD pipelines across MTN Ghana and enterprise client projects, integrating Trivy, SonarQube and Azure Key Vault to enforce security gates before every production deployment.
- Design, provision and manage 10 Kubernetes clusters across 5 environment tiers (MTN Dev/UAT/Prod + internal UAT/Prod) using Terraform and Helm enforcing RBAC, namespace isolation and network policies across all workloads.
- Build and maintain GPU-enabled MLOps infrastructure on AKS attaching Azure GPU nodes for Ollama LLM inference, managing Kubeflow pipelines and MLflow model registry, enabling 3 AI engineers to deploy and serve HuggingFace and TensorFlow models via containerized AKS workloads.
- Monitor and maintain 30+ MTN Ghana applications serving millions of users using Kibana, OpenTelemetry and SigNoz ensuring high-availability and rapid incident response across mission-critical telecom infrastructure.

- Lead architecture design sessions and present infrastructure proposals directly to MTN Ghana stakeholders driving approval of cloud solutions deployed at national scale.
- Implement and enforce zero-trust and least-privilege security policies across all Azure resources, Kubernetes clusters and CI/CD pipelines conducting regular security audits and vulnerability remediation.
- Provision multi-environment infrastructure as code using Terraform modules and Helm charts reducing environment provisioning time significantly and ensuring 100% reproducibility across all deployments.
- Configure Kafka-based data pipelines supporting AI/ML workloads and integrate model versioning, model registry and model serving workflows for production AI systems.
- Mentor and onboard new hire engineers across the full platform stack generating daily operational reports and maintaining internal documentation standards.
- Harden Oracle databases with encryption-at-rest, automated backup strategies and access controls aligned to enterprise security compliance requirements.

Application Support Engineer

Nalo Solutions, Accra Oct 2021 – May 2022

- Engineered and maintained Linux server infrastructure supporting an SMS portal processing 1M+ messages daily for multiple Ghanaian banks and financial institutions.
- Configured and monitored USSD services, payment system integrations and operator-facing features maintaining platform stability across AWS and Azure cloud environments.
- Hardened server security through firewall configuration, access controls and routine security checks reducing application errors and optimizing deployment workflows across environments.
- Managed Oracle database operations and executed code migrations across development, staging and production environments with zero data loss.
- Integrated 3rd-party payment and messaging APIs resolving cross-environment compatibility issues and ensuring reliable service delivery to banking clients.

Maintenance Engineer

Huawei Technologies (GH) S.A Ltd, Accra Sep 2020 – Aug 2021

- Supported Vodafone Cash Ghana Expansion, Vodafone Cash MDF and Ghana Commercial Bank mobile money projects maintaining enterprise infrastructure serving millions of Ghanaian users.
- Managed enterprise Oracle DB systems and executed UAT for USSD, Web, API and STK applications identifying and resolving critical defects across two major fintech deployments.
- Maintained and troubleshot enterprise hardware including OceanStor, E9000, TaiShan200, Utimaco HSM, ATAE 2.0 & 3.0, Switches and Firewalls executing planned migrations with zero unplanned downtime.
- Monitored server and systems health using I2000 NMS ensuring continuous availability of mobile money infrastructure for national-scale financial services.

EDUCATION

M.Sc. Computer Science(2025)

University of Ghana, Legon Specialization: Machine Learning & Data Visualization

B.Sc. Computer Engineering(Sept. 2016 – Aug. 2020)

Ghana Communication Technology University, Tesano Java Technology, Software Engineering, Embedded Systems

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional **2024**
- Oracle Cloud Infrastructure DevOps Professional **2025**
- Oracle AI Cloud Database Services Professional **2025**
- Oracle Cloud Infrastructure Foundations Associate **2025**
- Microsoft Certified: Azure Administrator (AZ-104) **2026**
- Certified Kubernetes & Cloud Native Associate (KCNA) **2025**
- Microsoft Certified: Azure Fundamentals (AZ-900) **2025**
